### How to bid at our Online Timed Auctions

Online Timed Auctions are designed to sell items online without the need for an auctioneer. Bidding can open up to 1 month before the auction and each lot closes at staggered intervals during the auction period. Every item is sold to the highest bidder when bidding closes. If a bid is received within the last 60 seconds the lot is re-opened for a further 60 seconds.

### Register to bid Online

The process for registering to bid in our Timed Auctions is the same as for our Live Online Auctions; You must first have an online Bidding account. Once you have created an Online Bidder Account, you need to register for the auction in which you wish to Bid.

**Please Note:** You need to register separately for each individual Auction. Please ensure you have registered at least 48 Hours in advance to ensure your account has been approved for bidding in good time. Once you have been approved to bid you will receive an email of notification from Euro Auctions with details of your Bidder Number & Approved Credit Limit. If you need to increase your Credit Limit, you will likely have to supply an additional deposit. Please contact your nearest Euro Auctions Office in such cases.

### Starting Bid

The starting bid for each lot is set at a percentage of the expected Hammer Price for the lot. It should be noted that all items in our Auction are unreserved and this price is simply to get bidding started.

### Increments

Increments are calculated by referencing the current bid against the auction increment table See below our Default Increment table:

Bids over 0.00 must be in 10.00 increments

Bids over 100.00 must be in 50.00 increments

Bids over 1000.00 must be in 100.00 increments

Bids over 2000.00 must be in 250.00 increments

Bids over 30000.00 must be in 500.00 increments

Bids over 50000.00 must be in 1000.00 increments

It should be noted that this increment table can change in some Auctions. The Increment table in use for any Auction can be viewed via the Bid Increments link in any Item Detail page

### Maximum Bids

When placing a Bid, the default bid a user is asked to place is the Minimum Next Bid which is set based on the Increments table. But the user also has the option of entering a Maximum Bid. This is the Maximum amount a bidder wishes to pay for the lot & must be a valid value as determined by the Increments table. Once a bidder has placed a maximum bid, any subsequent bids from other bidders that are less than the users Maximum bid, will only increase the current bid & asking price, but the user who entered the maximum bid will remain the high bidder, until another user enters a greater bid.

### Closing Times

Once the inventory is added to the Catalogue, closing times will be set for each item & displayed in the catalogue listings. Usually groups of 2 or 4 similar lots will all have the same closing times set for them. The closing times set for each item will not be an exact time, but a time period in which bidding for the item is due to close, e.g. 11:52:00 – 11:58:00. If any bids are received for the item within this time range, the final closing time will be extended by 1 minute. So instead of closing at 11:56:00, the item will remain open for bidding for another minute until 11:57:00. If another bid is received, bidding will be extended once again by another minute.

### Placing Bids

The Auction Catalogue may be available up to 1 month prior to an Online Timed Auction closing. In the period prior to lots closing, bidders may place a Maximum Bid at any time. You will receive a confirmation email once your bid is placed. You will also receive email notification when your maximum bid has been outbid by another bidder, or if you have won the Lot. Browse to the item in the Auction Catalogue, here you will find a summary list of all items in the Auction with Current Bid, Asking Price & Closing Times. Click on the Title Description hyperlink of the Lot you wish to place a bid on. This will take you to a detailed description of the Lot you have selected with the Current Asking Price & Closing Time for that particular Lot. Enter your Maximum bid & Click Confirm Max Bid. You will be taken to another screen to once again confirm the Bid you are placing. Click Confirm. You will now be taken back to the Lot Description page. You will now see that either you are High Bidder or that your Max Bid has been outbid by another bidder's Max Price. This item will now be added to your Watching & Bidding Lists in your My Items section of our website.
